

Thames Valley AAA Screening Programme

65+ and Male?

- You are entitled to free Abdominal Aortic Aneurysm (AAA) screening to detect if a widening of your aorta is present.
- Large aneurysms are rare but dangerous, up to 3000 men die each year in England and Wales from a ruptured AAA.
- A quick ultrasound scan can detect an AAA so it can be monitored and treated.
- Screening is available locally in Witney, Chipping Norton, Banbury, and other locations across the Thames Valley.
